

CLAIMS:

1. A method for the treatment of a cured rubber made of a curable rubber composition comprising a curable
5 organopolysiloxane, a curing agent therefor, and a silica filler having a mean particle size of 0.001 to 10 μm ,
the method comprising the step of post-treating 100 parts by weight of the cured rubber with 0.5 to 30 parts by weight of a hydrolyzable aminosilane or amidosilane having a
10 Si-N bond in vapor form.
2. A method for the treatment of a cured rubber made of a curable rubber composition comprising a curable
perfluoropolyether group-containing organosilicon compound, a
15 curing agent therefor, and a silica filler having a mean particle size of 0.001 to 10 μm ,
the method comprising the step of post-treating 100 parts by weight of the cured rubber with 0.5 to 30 parts by weight of a hydrolyzable aminosilane or amidosilane having a
20 Si-N bond in vapor form.
